

Culpeper Metro

The hub for Government and Federal agencies

Equinix is the world's digital infrastructure company. Digital leaders harness our trusted platform to bring together and interconnect the foundational infrastructure that powers their success.

Our Culpeper, Virginia, International Business Exchange™ (IBX®) data centers are strategically located 60 miles from Washington, D.C. and are business hubs for 125+ customers. These IBX locations are ideal for government agencies looking for state-of-the-art security. These buildings are among the most secure and technologically sophisticated data center facilities in the eastern U.S.

The Culpeper campus is a key location for federal IT initiatives and the federal cloud market, which is projected to grow at a compound annual growth rate of 57% through 2022. The campus consists of 199,000+ square feet (18,550+ square meters) of data center space, making it a physically redundant facility built for reliability and designed to exceed the needs of government agencies and enterprises in a digital age. Our customers can choose on-demand and direct access to multiple cloud providers and networks via Equinix Fabric™.

EQUINIX

Equinix value by vertical

For network service providers

- A highly secure and reliable, carrier-neutral environment to deploy computing, network, storage and IT infrastructure

For enterprises

- Equinix Fabric enables global connectivity to thousands of networking, storage, compute and application service providers in the industry's largest infrastructure ecosystem
- A secure bunker in every IBX designed to provide public sector clients colocation space that meets government standards
- Easy access to Continuity of Operations (COOP) environments, a federal government initiative to keep agency IT operations running essential functions under a broad range of circumstances

For cloud and IT service providers

- Ability to connect to customers, partners, content providers, networks and internet service providers

For content and digital media

- Direct connectivity to leading network operators for reduced latency

For financial services

- Multilayered, armed guard security, including roving perimeter and building security guards
- With Equinix Fabric, enable private, secure connections to cloud and payment partners and integrate payment systems
